

AUS GRADUATE PROGRAMS

2024-2025

For those looking to advance their careers
and contribute to their organizations and
communities

Because tomorrow matters

APPLY NOW!

w.aus.edu/apply

The world of work has changed, and continues to change, at a pace never seen before. No longer are jobs confined to one skill-set or one industry. To be professionally successful we must be constantly learning, adapting and innovating. Whatever your ambition, a graduate degree from AUS can set you apart, and prepare you for the challenges and opportunities that lie ahead. Through our world-class graduate programs we nurture, guide and develop ambition, creating individuals ready to innovate, influence and lead. Whether you want to make your mark on your organization, industry or the world, a graduate degree from AUS will allow you to be as successful as you want to be.

Find out how.

Welcome

AUS is one of the best known and highly respected universities in the Middle East, a reputation borne out of an unwavering commitment to academic excellence and the engagement of world-class faculty with outstanding credentials. By choosing AUS for your graduate education, you will become part of this pursuit of excellence, and share in the many advantages our campus and community have to offer.

A graduate degree from AUS can set you apart in a competitive work environment, help you carve out a new career path or allow you to pursue the highest academic attainments of your field. If you are ready to take the next step towards realizing your full potential, AUS can offer you a wide selection of graduate programs that are accredited and widely recognized the world over.

We look forward to welcoming you to our campus and partnering with you on your journey of continuing education.

Top 10 in Arab World for the past nine years (2024)
Top 50 under 50 years (2021)

Top five universities with the highest percentage of international students (2023)
Top 250 universities in Asia (2021)

First university in the GCC to be rated for sustainability by the Association for the Advancement of Sustainability in Higher Education's Sustainability Tracking, Assessment and Rating System

The AUS graduate experience

Discover why AUS is the first choice for graduate students across the Middle East.

Outstanding teaching and supervision

AUS has more than 350 full-time faculty, hailing from the world's best universities and dedicated to helping AUS students reach their full academic potential. Through our world-class faculty we can offer you unrivalled support in your graduate studies. Our faculty are active researchers who are uniquely positioned to deliver a rigorous graduate education in the GCC, as they combine a breadth of international knowledge with deep, regional understanding. Many of our graduates have pursued a PhD at some of the world's top universities.

World-class scientific research

AUS encourages and supports the research, scholarly and creative activities of its faculty and students. Graduate students have the opportunity to engage in research with faculty members and to publish their work.

Flexible learning

Those undertaking our graduate programs are typically engaged in demanding, time-consuming careers. Our programs are therefore designed to offer maximum flexibility, with part-time study and evening classes available.

Financial assistance

AUS offers graduate students assistantships and work-study opportunities. These are awarded on a competitive basis, coming in the form of a Graduate Research Assistantship or Graduate Teaching Assistantship. This offers not only financial assistance but also hands-on experience in teaching and research helpful to students interested in pursuing a career in academia.

Accredited in UAE and USA

AUS is licensed and its degree programs are accredited by the Commission for Academic Accreditation of the Ministry of Education's Higher Education Affairs Division in the United Arab Emirates. AUS has been accredited in the United States of America by the Middle States Commission on Higher Education (1007 North Orange Street, 4th Floor, MB #166, Wilmington, DE 19801 USA) since June 2004.

Excellent facilities

The AUS campus, known for its beauty, architecture and exceptional facilities, includes the region's largest fully equipped Interactive Trading Floor, along with well-equipped science and engineering laboratories. Our library is one of the finest in the region, and students can access the online catalog system to search for library materials from any location on or off campus. They can also access e-books, online databases, full-text journals and other digital resources. Technology is fully integrated into all of our courses. Our full-service campus also features a large sports complex, a health center, food outlets, residential halls and many other amenities.

Commercialization of research

The Sharjah Research, Technology and Innovation Park adjacent to the AUS campus provides a unique opportunity for AUS research projects to undergo commercialization. The park leverages the intellectual and academic capabilities of AUS, attracting regional and international companies to the park and promoting investment in AUS research advances.

Business and industry links

AUS has far-reaching associations with the region's business and industry leaders. While we are committed to academic excellence, we also take very seriously the need to create work-ready graduates. Industry-based research is therefore at the heart of many of our graduate programs. Our graduates are highly regarded by employers.

Accelerated Master's Program

AUS offers its ambitious and high-achieving senior undergraduate students the opportunity to combine their undergraduate and graduate study through the Accelerated Master's Program (AMP). AUS undergraduate students accepted into the AMP are able to complete up to two master's courses (six credits) during their senior year. These courses contribute to both the student's bachelor's and master's degrees, reducing the time to degree completion and cost. To learn more, visit w.aus.edu/amp.

Sharjah: The ideal place to pursue graduate study

There are many reasons why Sharjah has become a leading destination for university study, at both an undergraduate and graduate level. The third largest city in the United Arab Emirates (UAE), and part of the Dubai-Sharjah-Ajman metropolitan area, Sharjah is a dynamic, international and exciting place for students of all ages and backgrounds.

Sharjah is widely regarded as the cultural capital of the UAE, hosting a number of world-class museums and exhibitions. It is also known for its natural beauty, located on the sparkling Arabian Gulf and the Gulf of Oman and in easy driving distance to the sand dunes of the Arabian desert.

AUS is located just minutes from the heart of Dubai and the Dubai International Airport, providing students with easy access to the world-famous attractions of the neighboring emirate.

Sharjah has an active student community, providing a culturally diverse environment from students from all around the globe to meet, explore, develop and innovate. With a mix of languages, cuisines and cultural pursuits, Sharjah is rapidly establishing itself as a world-class student city.

SHARJAH

World Book Capital (2019)

Ranked in the Top 60 Best Student Cities (QS, 2024)

Located in the World's Second Safest Country (Global Finance, 2023)

College of Architecture, Art and Design

The College of Architecture, Art and Design (CAAD) is the heart of the region's design community, bringing together the region's most creative forward thinkers to test existing boundaries of design. With a focus on creating designs that will make life more efficient and more beautiful, CAAD faculty and students are at the forefront of innovation and transformation.

APPLY NOW!

w.aus.edu/apply

Master of Urban Planning (MUP)

Our cities are growing at an unprecedented rate. Never before has it been so important to have urban planners that understand the social, environmental, technological and economic impact of urban design. A Master in Urban Planning will help you shape the cities of the future, and fast-track your leadership career in urban growth management, urbanization policy or social development advancement. This program is a first-of-its-kind in the region, with alumni going on to shape and direct the emergence of cities in both the GCC and abroad.

w.aus.edu/caad/mup

“Cities have increased in size and population dramatically over the past decade, since more people have shifted to urban areas. This change has to be accompanied by proper, specialized planning...living in one of the fastest growing cities world-wide, I wanted to master the art of planning cities, creating vibrant spaces, achieving economic growth, social equality, and combating the effects of climate change... The AUS Master of Urban Planning helps me to achieve this passion through quality education.”

Mohamed Hasa Al Mutawwa
MUP student
Manager, Green Economy, RTA Dubai, UAE

College of Arts and Sciences

The College of Arts and Sciences inspires and promotes intellectual and creative potential, fostering talent that will help build capacity and capability across a number of industries and professions. Our graduate programs allow individuals to excel and lead in areas where demand for highly qualified professionals is high: teaching English to speakers of other languages, mathematics and materials science.

APPLY NOW!

w.aus.edu/apply

Master of Arts in International Studies (MAIS)

As the world becomes increasingly globalized, graduates with an advanced understanding of how the world works and the institutions that govern it are in high demand. This program has been designed to place its graduates at the helm of international affairs, readying them to be the next cohort of leaders. The multidisciplinary curriculum combines insights from history, political science, sociology, anthropology and philosophy. This broad-based program enables students to gain a deep understanding of complex global challenges, ranging from geopolitical conflicts to the intricacies of international diplomacy and social and economic currents.

w.aus.edu/cas/mais

Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL)

This premier program prepares individuals for a career in Teaching English to Speakers of Other Languages (TESOL). With the vast resources and faculty of the AUS Department of English, the program has been specifically designed to meet the needs of participants in a diverse, multicultural setting. Offering professional training and a solid foundation in second language acquisition, this program is popular among the region's experienced and novice teachers in addition to those who are seeking a research career in applied linguistics. The program combines research-based methodology, practical experience and computer-assisted learning and is delivered through a comprehensive and dynamic curriculum.

w.aus.edu/cas/matesol

“ I never knew how much I love doing research and how much fun one can possibly have while doing it. While a PhD researcher at the Institute of Education, University of Reading, UK, I studied teachers’ reflection for my dissertation, and it became my passion. The topic of reflective practice was first introduced to me in the AUS MA TESOL program.”

Dr. Shahla Yassaei
Deputy Director and Management Consultant,
Oxborrow Ltd., UK

PhD in Materials Science and Engineering (PhD-MSE)

This multidisciplinary program aims to develop regional expertise and contribute research, innovation and novel solutions to benefit the water treatment, sustainable energy, manufacturing, healthcare and construction sectors, among others. Students will be at the frontlines of research and innovation in a range of areas: advanced materials, such as nanomaterials for electronics or healthcare; materials for energy and environment, including green technologies; structures, including the construction of sustainable infrastructure systems; and analytical and computational modeling and simulation.

Talented bachelor's degree holders from select programs can be directly admitted to this PhD program, allowing them to get an earlier start on their doctoral studies.

w.aus.edu/cas/phdmse

PhD in Mathematics (PhD-MTH)

This doctoral program offers advanced education and research opportunities in pure and applied mathematics. With a mission to cultivate mathematicians equipped for impactful careers in academia, government or industry, the PhD-MTH curriculum fosters independent research and problem-solving skills. Graduates emerge with deep expertise in key mathematical areas, adept at conducting original research and effectively communicating findings.

w.aus.edu/phd-maths

Master of Science in Mathematics (MSMTH)

For individuals looking for rigorous and thorough training in a broad range of pure and applied mathematics, this program has been designed for those seeking career advancement or a foundation for a PhD in mathematics-related fields. The program allows students to conduct independent research in specialized mathematics areas and apply advanced mathematical concepts to workplace challenges. Graduates of the program have gone on to work in prestigious mathematics-based roles in public and private organizations in the Middle East, and around the world.

w.aus.edu/cas/msmth

“The faculty members enhanced our cognitive abilities to prepare us for future challenges. It was a blessing to pursue my master’s degree at AUS because it not only increased my interaction with these scholarly heavyweights and the undergraduate students, but it also enriched my mathematical skills.”

Binish Jamal
MSMTH graduate

Reasons to choose CAS:

- Through our links with local schools at all levels, students in the MA TESOL program have the opportunity to observe, explore and implement effective ESL teaching strategies.
- Students in the MSMTH program can gain invaluable teaching experience by contributing to courses at the undergraduate level in mathematics at AUS.
- In the PhD-MSE program, students work on cutting-edge research with faculty members who are experts in their fields.
- The MAIS curriculum is benchmarked against prestigious programs like the School of Foreign Service at Georgetown University, American University of Beirut's Master of Arts in Public Policy and International Affairs, and the Master of Global Affairs program at Rice University.

College of Engineering

At the College of Engineering, we are getting ready for the future. Our graduate programs focus on giving engineers the specific technical and management skills they need to take their careers, their organizations, and their industries to the next level. We combine academic rigor with real-world application, ensuring participants of our master's programs are ready to take their new found knowledge to the workplace, fostering real and lasting change.

APPLY NOW!

w.aus.edu/apply

Master of Science in Biomedical Engineering (MSBME)

As the first of its kind in the GCC, this dynamic, multidisciplinary program will prepare you for an advanced career or doctoral studies in the rapidly developing field of biomedical engineering in areas related to healthcare operations management, planning and risk management, biomedical informatics, instrumentation, signal processing, biomaterials, drug delivery and biomechanics. Based on American standards and offering a wide range of elective courses, this program is a first choice for ambitious individuals who seek to be at the forefront of developments in the industry.

w.aus.edu/cen/msbme

Master of Science in Chemical Engineering (MSChE)

This program is designed for professionals looking to actively contribute to the growing international body of chemical engineering knowledge and play a part in the region's R&D commitment to this field. The program will equip you with excellent technical, analytical and practical skills and strengthen your knowledge in core areas such as transport phenomena, thermodynamics, kinetics and reactor design.

w.aus.edu/cen/msche

Master of Science in Civil Engineering (MSCE)

A popular choice for professionals looking to combine advanced civil engineering practice with technical research, this program allows them to play a commanding role in the industry both in the UAE and abroad. Taught in an environment that promotes excellence in teaching and research, the program applies advanced mathematics and engineering knowledge to identify, formulate and solve real-world problems. The program covers a wide range of civil engineering areas including structural and materials, geotechnical, transportation, environmental and water resources, construction management and others.

w.aus.edu/cen/msce

Master of Science in Computer Engineering (MSCOE)

This program is designed for those looking to pursue cutting-edge engineering projects that will define the future of the region and beyond. Graduates of this program have progressed into some of the world's leading technology companies, working in computer hardware, computer systems, mobile phones, communications, banking, computer games and more.

w.aus.edu/cen/mscoe

“I was delighted to pursue my master's in mechatronics engineering at AUS, where I was involved in several engineering research themes in the area of unmanned aerial vehicles. Being surrounded by intellectual colleagues and supervised by motivated professors, I was able to publish my research findings in high-impact conferences and journals in the field.”

Mohammad Al-Sharman
PhD candidate, University of Waterloo, Canada

Master of Science in Construction Management (MSCM)

Focusing on competencies required for the construction sector's rapid technological advancement, such as AI and big data, the new MSCM will help deliver the talent required to drive the sector's growth across the region and beyond. The program will help students develop the skills and knowledge needed to rapidly advance in a construction management career, or to pursue a PhD.

w.aus.edu/cen/mscm

Master of Science in Electrical Engineering (MSEE)

This much sought-after program is renowned for its rigorous training and dynamic approach. The program combines electrical engineering practice with cutting-edge technical research, preparing students for further educational achievement or an advanced career in the field of electrical engineering. Participants will contribute to the growing body of electrical engineering knowledge, research and development, in topics related to power systems, renewable energy, communications and signal processing, control systems, microelectronics, microwaves and satellite systems.

w.aus.edu/cen/msee

Master of Science in Engineering Systems Management (MSESM)

Designed for graduates across all engineering disciplines, and one of the most popular graduate programs at AUS, this master's is a premier choice for engineers looking to become organizational leaders. The program ensures students are equipped with the right tools and knowledge to integrate complex systems, managing technology, work activities and projects in both the public and private sectors. Students come to understand how to combine technical skills with economic and managerial knowledge.

w.aus.edu/cen/mseesm

Master of Science in Machine Learning (MSML)

This program equips students for advanced careers and doctoral studies in machine learning (ML) disciplines. ML is pivotal in AI and influences various domains like healthcare, finance and transportation. The program aligns with the UAE's vision of a knowledge-based economy, fostering innovation and research. Students develop research and leadership skills within a global context, emphasizing ethics and teamwork. The curriculum mirrors US standards, covering advanced topics including big data analytics, generative deep learning and cognitive robotics.

www.aus.edu/cen/cse

Master of Science in Mechanical Engineering (MSME)

Designed for those working in the subdisciplines of thermal and green energy systems, fluid systems, solid mechanics, design and others, this program enhances the technical skills of mechanical engineers, equipping them to meet the demands of the professional both now, and in the future. This program helps mechanical engineers to fulfil their potential and realize their ambitions for commercial leadership or entry into a doctoral program.

w.aus.edu/cen/msme

Master of Science in Mechatronics Engineering (MSMTR)

This is an interdisciplinary program that integrates science and engineering concepts to address grand challenges in the ever-changing industrial sectors. Our program offers exciting opportunities for excellent students from a wide spectrum of backgrounds to engage in cutting-edge research with highly qualified faculty and world-class facilities and resources. Graduates go on to become experts across a number of sectors including defense systems, space systems, robotics, vehicle design, software development, automated production systems, food processing and many others.

w.aus.edu/cen/msmtr

PhD in Biosciences and Bioengineering (PhD-BSBE)

The PhD-BSBE offers advanced multidisciplinary education to equip students with the necessary knowledge and skills to become future researchers, academics and entrepreneurs. Graduates of this program will be prepared to combat current and future healthcare challenges nationally and globally. The multidisciplinary program is delivered by CEN and CAS.

w.aus.edu/phd-bsbe

PhD in Engineering Systems Management (PhD-ESM)

This program will fill demand for highly qualified systems management professionals and researchers in the Middle East, borne out of the region's rapid economic growth. The doctorate will provide engineers with the specialized knowledge required to oversee large-scale projects, combining technical engineering expertise with management skills. As well as a strong scientific and engineering elements, the PhD will cover areas such as supply chain management, sustainable construction project management, smart cities management and engineering management.

w.aus.edu/cen/phdesm

“The AUS MSBME program has been a great first step for my career in academia. Being exposed to an array of trending and multidisciplinary topics related to biomedical research and technology provided me with a rich educational experience and a solid foundation to pursue PhD studies. I am very grateful to my professors, who guided me throughout my learning and growth journey.”

Omnia Hassanin

MSBME student and Graduate Teaching and Research Assistant

Reasons to choose CEN:

- **Our programs benefit from some 50 labs and workshops supporting the various engineering disciplines.**
- **AUS is developing an innovation and entrepreneurship ecosystem through strategic partnerships with the Sharjah Research, Technology Innovation Park and the Sheraa Sharjah Entrepreneurship Center.**
- **AUS is ranked by QS World Subject Rankings 2023 in the following subject areas:**
 - **civil and structural engineering: number one (tied) in the UAE and among the top 200 globally**
 - **electrical and electronic engineering: among the top three in the UAE and top 300 globally**
 - **mechanical, aeronautical and manufacturing engineering: among the top two (tied) in the UAE and top 300 globally**
 - **chemical engineering: among the top three in the UAE and top 400 globally**
 - **computer science and information systems: among the top four in the UAE and top 450 globally**

School of Business Administration

The School of Business Administration is the place to be if you are ambitious, motivated, and want to learn among the best, and from the best. We have an unwavering dedication to excellence, supporting and encouraging students to think beyond themselves. Our graduate programs are sought after by professionals wanting to transcend the heights of their profession or industry, and learn in an environment driven by innovation, practical application and intellectual rigor.

APPLY NOW!

w.aus.edu/apply

Master of Business Administration (MBA)

The AUS MBA provides graduates with the skills needed to be competitive in today's dynamic, global marketplace and will allow them to achieve a globally recognized and respected MBA from a leading institution, while being able to complete core components online. The educational experiences our students have as they pursue their MBA prepare them for productive business careers and enable them to make valuable contributions to the organizations they join. Using a blended learning course delivery mode that includes both face-to-face and online components, the program offers digital content customized to student needs, catering to different student learning styles and supporting self-paced, flexible learning.

w.aus.edu/sba/mba

Master of Science in Accounting (MSA)

If you are looking to progress a career in public or private accounting, this program will provide you the skills and knowledge necessary to thrive in contemporary accounting roles. The program focuses on equipping participants with the confidence and ability to tackle accounting challenges across a diverse range of industries and sectors. It is designed to create additional employment opportunities for participants in areas such as auditing, taxation, consulting, chief financial control, financial analysis and more. Furthermore, the MSA prepares students for the Certified Public Accountant (CPA) Examination, and meets the 150-semester-hour education requirement for CPA certification.

w.aus.edu/sba/msa

Master of Science in Finance (MSF)

Designed for ambitious professionals looking to enhance their financial credentials, this fully accredited program will provide you with an in-depth perspective of the financial services industry, and the tools to flourish in your career. By taking part in this program, you will broaden your finance-specific knowledge in areas such as insurance, securities law, banking and insurance, financial markets, investment banking, corporations, financial advising public institutions and much more. In addition, the MSF is designed to prepare students for the Chartered Financial Analyst (CFA) Level II and III examinations.

w.aus.edu/sba/msf

PhD in Business Administration (PhD-BA)

Concentration in Finance

This program equips individuals with the latest knowledge of business concepts, and provides hands-on experience of real issues in the finance world. Throughout the program, candidates are given multiple opportunities to enhance their understanding of management, policy and strategy, and how this understanding can be applied for maximum benefit. Upon completion of the program, graduates will be well placed to continue to advance their careers in academia or the business world.

Additionally, through a partnership with the prestigious Darla Moore School of Business at the University of South Carolina (UofSC), selected students in this program can travel to the United States for part of their studies and earn two doctoral degrees—one from AUS and one from UofSC.

w.aus.edu/sba/phdba

“I chose the MBA at AUS, despite the distance, because of its accreditation and reputation. I never looked back. Simply put, AUS takes you through the famous four learning phases. By the time you go into your courses you are conscious of your competence, which is where I think the greatest value is in terms of building your career esteem and accelerating your development. You are a better professional for yourself, your company, and the world at large.”

Ghandi Gharaibeh

Director of Marketing, GlaxoSmithKline, Gulf and Near East

Reasons to choose SBA:

- SBA is accredited by the Association to Advance Collegiate Schools of Business (AACSB International). This honor makes us part of an elite group, as fewer than 5 percent of the world's business schools have achieved this prestigious distinction. SBA is one of the few business schools in the UAE with this recognition.
- SBA is the first business school in the region to be recognized as a Bloomberg Experiential Learning Partner (ELP).
- According to QS World University Subject Rankings 2023, AUS is number one (tied) in the UAE and among the top 200 universities globally for accounting and finance, and number one in the UAE and among the top 250 universities globally and for business and management.
- The AUS MBA program ranked among the top 10 in the Middle East and Africa region and among the top 250 in the world in the QS Global MBA Rankings 2022.

APPLY NOW!

w.aus.edu/apply

Check the application deadline:
w.aus.edu/ms-dates | w.aus.edu/phd-dates

Complete your online application:
 Upload documents as per the minimum requirements and apply for assistantship: w.aus.edu/apply

Submit additional required documents: Go to Supplemental Items & Documents on apply.aus.edu

Check your email regularly for application status updates.

Graduate admission offer:
 Download your admission letter from apply.aus.edu and download the *New Graduate Students' Guide* from w.aus.edu/gr-adpkg

Present original official attested documents during File Completion session:
 Including university transcript(s), graduation certificates (w.aus.edu/ms-ats; w.aus.edu/phd-ats) and equivalency certificate (w.aus.edu/ms-uae-ce; w.aus.edu/phd-uae-ce) as required

American University of Sharjah considers all applications on the basis of qualifications, regardless of race, color, gender, disabilities, religion, age or national origin.

AUS strives to offer all students full and effective participation in university, and it aims to provide eligible students with appropriate academic accommodations. An appropriate academic accommodation in university is an approved modification or adjustment that will result in an opportunity for students of determination to attain the same level of performance and enjoy the same level of benefits or experiences as other students without compromising bona fide academic requirements and standards.

Indicating in the application you are a student of determination will not impact your application to AUS. The information provided will be kept confidential and will be used to allow the Academic Support Center to connect with you regarding possible academic accommodations.

Admission Types

Your admission to AUS will be granted under one of the following categories, based on how well you meet the university's requirements:

Full Admission*	For applicants who meet all admission requirements.
Conditional Admission	For masters' degree applicants with a cumulative GPA between 2.50-2.99 on a scale of 4.00, and/or applicants who do not meet the English Proficiency required scores [TOEFL iBT 71-79, TOEFL ITP 530-547 or IELTS 6.0 (Academic)]. Conditionally admitted students are not eligible to register for more than two graduate courses (a maximum of six credits) within the first two semesters of study.
Remedial Admission	Masters' degree applicants with a cumulative GPA below 2.5 and above 2.0 may be considered for remedial conditional admission on a case-by-case basis as evaluated by the program. Remedial admission is only applicable for programs in the College of Engineering and the College of Architecture, Art and Design.

* PhD applicants are eligible only for full admission.

Completing the Admissions Process

Once you have received your admission letter from the Graduate Admissions, you will need to present original documents in person or in a virtual meeting that you can book with the admission staff in order to complete your file with the Office of Enrollment Management—Graduate Admissions.

* Waiver of English Language Proficiency Requirement

Applicants to AUS graduate degree programs may be exempted from the English language proficiency admission requirement provided the conditions below are met. Decisions regarding exemptions are made by the Office of Enrollment Management—Graduate Admissions. Applicants are required to present supporting documents.

Master's Programs

Applicants who are native English speakers and who completed their undergraduate education in an English-medium institution may be considered for exemption from the English language proficiency admission requirement. Holders of a bachelor's degree awarded by AUS are exempted from the English language proficiency admission requirement.

PhD Programs

Applicants who earned a master's degree from an institution where English is the language of instruction and who met the AUS English language proficiency requirement for full graduate admission at the time of their admission to that master's degree program are exempt from the English language proficiency admission requirement. Holders of a master's degree awarded by AUS are exempted from the English language proficiency admission requirement.

Applying from outside the UAE?

Prior to making any plans to travel to AUS, contact the UAE Ministry of Education's Higher Education Affairs Division for a full list of the required documents and attestations to be obtained from your home country or the country in which you studied. Visit [w.aus.edu/ms-apr](https://www.aus.edu/ms-apr) for master's students or [w.aus.edu/phd-apr](https://www.aus.edu/phd-apr) for doctoral students.

Important Dates

Dates are tentative and subject to change. Check [aus.edu/masters/deadlines](https://www.aus.edu/masters/deadlines) or [aus.edu/doctoral/deadlines](https://www.aus.edu/doctoral/deadlines) for updates.

Fall Semester 2024: Master's and PhD Admission		Spring Semester 2025: Master's Admission	
October 9, 2023	Applications open	October 7, 2024	Applications open
May 30, 2024	Deadline to apply for graduate assistantships	November 21, 2024	Deadline to apply for graduate assistantships
July 1, 2024	Early File Completion	December 26, 2024	Deadline for Spring 2025 applications
July 25, 2024	Deadline for Fall 2024 applications	January 13-16, 2025	Course registration for new students
August 28, 2024	Welcome session for new students	January 15, 2025	Welcome session for new students
August 26-29, 2024	Course registration for new students	January 20, 2025	First day of classes
September 2, 2024	First day of classes

* Number depends on the program option selected by the student (as applicable)

** A minimum of 30 credits will be on dissertation.

*** A minimum of 27 credit hours will be on dissertation.

Paying for Graduate Study at AUS

Tuition fees are paid on a semester basis and are based on the number of credits a student is taking that semester. If the full fees cannot be paid immediately, installments can be arranged with the AUS Finance Department/Student Accounts. For more information, please see [w.aus.edu/fees-payment](https://www.aus.edu/fees-payment).

Graduate Assistantships and Work-Study

AUS offers graduate students two types of on-campus employment: **graduate assistantships** and **graduate work-study positions**. Assistantships are available to qualified graduate students and are competitively awarded and merit based. A Graduate Research Assistantship offer students opportunities to develop research experience by working with a faculty member on research-related activities. A Graduate Teaching Assistantship gives students teaching-related experience by working as a lab assistant or assisting faculty members in courses. A variety of student work-study opportunities are available through specific departments, graduate programs and AUS internal research grants to faculty members.

THE AUS STORY

AUS was founded in 1997 by His Highness Sheikh Dr. Sultan bin Mohammed Al Qasimi, Member of the Supreme Council of the United Arab Emirates and Ruler of Sharjah. Sheikh Sultan articulated his vision of a distinctive institution against the backdrop of Islamic history and in the context of the aspirations and needs of contemporary society in the UAE and the Gulf region.

Firmly grounded in principles of meritocracy and with a strong reputation for academic excellence, AUS has come to represent the very best in teaching and research, accredited internationally and recognized by employers the world over for creating graduates equipped with the knowledge, skills and drive to lead.

AUS values learners not driven only by academic success, but by those that embrace our dynamic campus life and embody our ideals of openness, tolerance and respect. This combination of academic excellence and community spirit ensures AUS is filled with world-class faculty and students, poised to become the innovators, thinkers, contributors and leaders of tomorrow.
